WANTED:
PIONEERS IN AI

JOINT ANNUAL MEETING OF THE GERMAN AND AUSTRIAN SOCIETIES OF NEURORADIOLOGY 2019:
CALL FOR START-UPS!

www.neurorad-international.com
Neuroradiology has always been at the forefront of integrating new technologies to improve diagnostic and therapeutic procedures for patients. Continuing this tradition of pioneering work, the German and Austrian Societies of Neuroradiology will be embracing new technologies during their joint biannual meeting in 2019.

We are looking for innovative start-up companies, research groups and students from the fields of

- machine learning/artificial intelligence
- data management
- robotics and
- virtual/augmented reality

with applications to

- diagnostics
- minimally invasive therapies
- structured reporting
- workflow optimization and
- resident training.

The 2019 meeting of the German and Austrian Societies of Neuroradiology is going to bring together experts from various backgrounds in order to become an innovation hub focusing on the translation of new applications into day-to-day patient care. Our dedicated StAR-Lounge ("Start-up and Applied Research") will offer unique networking opportunities for researchers, entrepreneurs and users.

We encourage all participants to submit abstracts related to their current research in order to present them in our StAR-Power-Pitch-Session ("Neuroradiology meets Bioinformatics").

For further information please visit www.neurorad-international.com/star-lounge.html.

ABOUT NEURORAD

neuroRAD is the annual congress of the German Society of Neuroradiology (DGNR e.V.) and Europe's largest congress of neuroradiological imaging and interventional procedures with over 1,000 participants from medicine and industry. The congress takes place at Kap Europa, one of the most modern congress venues in Frankfurt a. M.
